

## AS6004 RC10CC Classic Clear Edition Kit

**ELECTRIC ■ OFF ROAD ■ 1:10 SCALE ■ 2 WHEEL DRIVE ■ KIT**

### THE RC10CC COLLECTOR'S EDITION KIT

Own the car that changed RC off-road racing forever. Now, in a crystal-clear collector's edition!

We have shown you our SLA prototype race cars for years and how we use them for parts fit and testing. Our goal with the RC10CC was to provide you with the same look and feel as our SLA prototype display vehicles but more cost-effective and practical. We took the RC10 Classic and shot many of the molds in polycarbonate clear. While it is stronger than SLA and could be driven, it was manufactured as a display piece for your collection.

The polycarbonate clear components will only be available in the kit. They will not be sold individually.

### RACE-WINNING ENGINEERING

The RC10CC suspension is damped for maximum traction by long-throw, fluid-filled racing shocks-using machined alloy cylinders and drill-blank shafts for silky-smooth action.

The RC10CC suspension gives you all the adjustability of full-size race buggies. The A-arm/Ball joint design allows precise camber, caster, ride height, and spring rate tuning. The adjustable VariLok differential is included, and the updated chassis fits 6-cell NiMH and 2S LiPo battery packs.

Exceptional ground clearance and low center of gravity also contribute to the superb balance and performance of the RC10CC.

## RACE-WINNING DESIGN AND PERFORMANCE

The RC10 started as the vision of Team Associated's founder Roger Curtis ("RC") and became one of the most iconic RC cars in history.

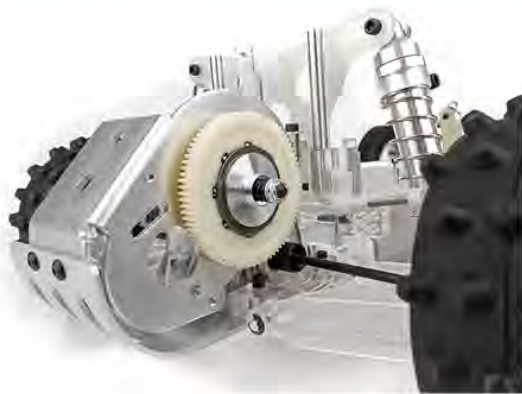

In celebration of the 40th anniversary of the original RC10, we are proud to bring to you the RC10CC Classic Clear Edition kit, a faithful reproduction of Roger's World Championship-winning design that changed the world of RC off-road racing forever.

The design and construction of the RC10 is totally unique to electric off-road cars, featuring a rigid alloy monocoque tub with fully adjustable suspension.

Included are Associated's custom coil-over aluminum racing shocks, VariLok differential, and modular 3-piece clamping wheels.

Engineered for easy assembly and maintenance, the RC10 is also easy to drive over all kinds of terrain.

## GET A JUMP ON THE COMPETITION

Full race rear suspension includes durable dogbone and stub axle drivetrain with pinned modular wheels. Quick-release knockoff design provides fast, accurate alignment. Low-profile gearbox uses VariLok adjustable diff and is protected by an integrated motor/heatsink.

Independent suspension with coil-over shocks help smooth out the bumps. Precision-molded, nylon suspension components can be easily custom color dyed. A-Arm/Ball joint design permits static camber, camber rise, caster, ride height, and spring rate tuning to suit every type of track.

The smooth undercarriage of the RC10CC's aluminum monocoque tub and special gearbox provide maximum ground clearance.

## RACE CAR TECHNOLOGY

- The RC10CC Clear Classic is designed to fit 6-cell NiMH and 2S LiPo battery packs
- Modular wheels
- Adjustable aluminum racing shocks
- Front skid plate
- T6 aircraft aluminum monocoque chassis
- Fully adjustable four-wheel independent suspension

*The polycarbonate clear components will only be available in the kit. They will not be sold individually. Images shown include items not included with kit. See list on next page for items needed to complete the kit.*

## MORE FEATURES

- Authentic replica of the RC10 Buggy Kit originally released in 1984
- Silver-anodized 6061-T6 aluminum monocoque tub chassis
- Fully adjustable four-wheel independent suspension
- Long-travel, fluid-filled silver anodized aluminum coil-over shocks
- Low profile, sealed six-gear transmission
- VariLok adjustable ball differential
- Exceptional ground clearance with a low center of gravity
- Front and rear tires with modular racing wheels
- Clear Pro-Tech body with driver figure and wing
- Fiberglass shock towers
- Oilite bushings throughout
- Fits 6-cell NiMH and 2S LiPo battery packs

## SPECIFICATIONS

Scale	1:10
Power	Electric
Length	381mm (15")
Width	226.8mm (8.93")
Weight	Varies
Wheelbase	267.7mm (10.54")
Drive	2WD

## ITEMS NEEDED TO COMPLETE

- 6-cell NiMH or 2S LiPo radio-controlled car
- Radio control battery charger
- Electronic speed control
- RC car electric motor
- Pinion gear
- Paint for the body
- Steering servo
- 2-channel RC surface transmitter and its batteries
- 2-channel receiver
- Recommended: Glue for tires and wheels
